

FLANGE JOINT KITS

Avarus Valves can supply flange joint kits to manufactured to individual specification. We can offer various materials for both the fasteners & gasket that offer excellent corrosion resistance in sea water and other arduous environments. Material testing and certification can also be supplied to NORSOK M-630, individual project or client requirements.

Custom Made Flange Joint Kits

Simply tell us your fastener requirement:

- Various grades of Steel, Super Duplex, Duplex, Stainless Steel, Inconel®, Monel®, Hastelloy®, Aluminium Bronze, Titanium and other materials.
- Any documentation or material testing.

& your gasket requirement:

- Type of gasket — full face, ring, spiral wound, ring type joint.
- Material — elastomer, fibre, graphite, PTFE.
- Size.
- Pressure & temperature ratings.

The fasteners can be supplied as bolts, setscrews or studs to any length preferred to suit individual requirements.

A fastrack service can be offered for urgent deliveries.
