

## CUSTOM-MADE STRAINERS

Avarus Valves custom-made strainers filter fluids to give protection to valves or components in a system. We can manufacture in various grades of materials that offer excellent corrosion resistance in sea water environments and applications. Material testing and certification can also be supplied to individual project or client requirements.

### Features

- Various materials of construction.
- Various sizes.
- Various flange or threaded connections available.
- Various element perforation sizes.
- Full bore design.

### Application

- Can be manufactured for various fluids, working pressures and operating temperatures.

Materials of construction available are:  
Super Duplex, Duplex, Stainless steel, Inconel, Monel, Aluminium Bronze, Titanium and various other materials.

Various material testing is available to Norsok and other standards if required.
